Personal Portfolio

Hard skills

- **Programming Languages:** Java | Go | C# | Python | JavaScript | C/C++
- **Frontend:** React | Next.js | Angular | TanStack Query | Tailwind CSS
- **Backend:** Spring Boot Stack | Gin | Fast API | .NET | Nodejs
- **Databases & Data Streaming:** Mysql | NoSQL | PostgreSQL | SQLite | Redis | Data Streaming Concepts & Tools (Kafka)
- **Cloud & DevOps:** AWS | Linux-based Systems | Kubernetes | CI/CD | Docker(Containerization) | Terraform
- **Architecture & Design:** RESTful APIs | Software Architecture (Styles & Patterns) | Microservices Architecture | Enterprise Integration Principles
- **Engineering Practices:** Object object-oriented programming | Parallel & Concurrent Programming | functional programming| Quality Engineering | QA | Debugging | CI/CD & Deployment Pipelines | Networking Fundamentals | Software lifecycle | Production Support | project Scaffolding | Performance optimization

About Me

A motivated, hard-working full stack developer with 3 years of industry experience in software applications development. I really enjoy exploring emerging technologies and turning complex technical requirements into functional, impactful products. I thrive on challenges, and excel in teamwork. And also I'm eager to contribute to the industry by delivering impactful results while continuously growing and adapting in this dynamic field.

Education

BSc. Eng. (Hons) in Electronic and Telecommunication Engineering
University of Moratuwa July 2020 – June 2024

Specialized in Computer vision and machine learning

G.C.E. A/L, Physical Science
St. Aloysius College, Ratnapura 2019

District Rank 9, Island Rank 161

Professional Experience

Software Engineer
Kast Finance (Singapore - remote) June 2025 – Present

- Built secure **Go (Gin, GORM)** APIs using **hexagonal architecture**, separating business logic from external systems and infrastructure.
- Built **Next.js** admin interfaces with Auth0-based **authentication and role-based access control**, integrated with backend REST APIs.
- Built a notification platform using **Kafka** for event-driven delivery and **cron-scheduled jobs** to trigger **email (SendGrid)** and **push notifications(Firebase)** , with multi-language content (Localize).
- Designed REST API specifications and **FSDs**, covering endpoints, schemas, workflows, and implementation details for backend services.
- Collaborated in Agile Scrum teams, participating in sprint planning, daily stand-ups, and retrospectives to deliver incremental software improvements.

Skills: Go | Gin | GORM | PostgreSQL | Redis | Apache Kafka | React | Next.js | TypeScript | Firebase | AWS

Software Engineer/ DevOps
ZeroOne Technologies (Sri Lanka - part time) May 2024 – July 2025

- **Unbranded.LK(Cloud-Native SaaS Deployment Platform)**
  Designed and developed a cloud-native infrastructure platform to automate the deployment and management of multiple SaaS applications across cloud and local environments.
  Implemented automated testing and participated in code reviews to ensure high-quality deliverables aligned with Quality Engineering standards.

Skills: Azure Kubernetes Service (AKS), Docker, Helm, Keycloak, Ollama, Terraform, GitHub Actions, Jenkins, Traefik, Docker Compose, TLS, Relational Databases, Document Databases, Cloudformation

- **Smart Caravan Monitoring and Control System**
  Developed a ESP32-based embedded control unit and Flutter mobile application that connects over Bluetooth to the control unit for a caravan.

Skills: Flutter, C++, ESP32, Bluetooth Low Energy, Analog Electronics

Software Engineer Internship
Zebra Technologies (Sri Lanka - On-Site) November 2023 – July 2024

- **Zebra Communication Analyzer**
  Developed a Windows application (C#, .NET Framework) for firmware testing of barcode scanners, backed by a C++ driver compiled as a DLL for USB communication.

Projects

Visual SLAM for Embedded Devices (Final Year Research)

C++, YOLOv10, OpenCV, Linux

Segment-Based Train Seat Booking System (git)

Java, Spring Boot, Modular Monolith, PostgreSQL, Terraform, AWS

Post Office - MIS (git)

React, React Native, Node.js, Express, Firebase, Three-tier architecture

AI-Powered Document Q&A Chatbot (RAG) (git)

Python, LangChain, ChromaDB, Ollama (Llama 3)

BHS Data Management System (Katunayake International Airport)

React, Tailwind CSS, JWT, Spring Boot, PostgreSQL, Redis, Docker

Transport Application (git)

flutter, Firebase, Google Cloud Services
